## DETAILED ACTION

### *Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 25, 27 and 28 drawn to a pharmaceutical composition for the treatment of female hormonal deficiencies comprising an estrogenic compound and a non-aromatizing androgenic compound.
- II. Claims 1-24 and 26, drawn to a method of treating hormonal deficiencies in a woman undergoing estrogen replacement therapy comprising administering estrogen and a non-aromatizing androgen.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product since the product can be used to treat osteoporosis.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1617

Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Further restriction may be required.
